SCR071009-2IG	Elimination of Qwest internal 10 business day Switch Homing Arrangement (SHA) Grace Period to ensure Qwest adherence to industry guideline LERG effective date.	07/10/2009 Submitted	Wholesale System	NA	

Director

Originator Rodgers, Todd

Owner Rodgers, Todd

CRPM Stecklein, Lynn

Originating Company: Qwest Corporation

Description of Change

Qwest has an internal practice for tandem Switch Homing Arrangement (SHA) changes that is no longer practical nor in compliance with industry guidelines. That practice allowed a "grace period" of 10 business days to accept traffic at the "old" tandem and continue termination to the final destination.

See ATIS (Alliance for Telecom Industry Solutions) document 0300037, Network and Routing Resources Educational Document: Intercompany Responsibilities in the Telecommunications Industry.

Excerpt:

Effective Date - The date by which routing and rating changes within the PSTN must be complete for the assigned thousands-block or the assigned CO Code. Also, the date by which the thousands-block becomes an active block. (Also referred to as "the LERG effective date.") (Emphasis added by Qwest.)

Each provider determines the LERG effective date that is to be implemented. Qwest has no control over that date. Qwest will no longer provide a grace period and will make appropriate changes to our switching fabric on the LERG® (Local Exchange Routing Guide) effective date.
